BIOENERGY FACT SHEET

Up To 72% Refund On 2008 RRSPs!

GREEN POWER ALTERNATIVES FOR GENERATING ENERGY & FUEL FROM BIOCHIPS, UTILIZING INDUSTRIAL WASTE, CLEANING UP THE ENVIRONMENT, REDUCING CARBON EMISSIONS & OUR GRID DEPENDENCE!

KEY APPLICATIONS For BioChip Energy

BioMass Energy can be used for:

- ⇒ **Independent Power Producers** – to feed alternative power into the grid produced from biomass, reducing our dependence on depleting oil and environmental pollutants.
- ⇒ **Industrial Co-Generation** – providing electricity to industrial sites along with hot water for heating or hot air for kiln drying.
- ⇒ **Community CHP Plants** – providing Combined Heating and Power (CHP) from biomass, ideal for central community plants.

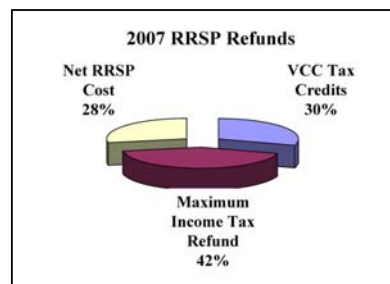

BioChip Technologies. KEY BENEFITS:

- ⇒ **Use waste biomass from forest harvesting for power production**
- ⇒ **Help clean up the beetle kill in BC, also reducing fire hazard.**
- ⇒ **Reduce carbon emissions and help slow global warming.**
- ⇒ **Utilizing forest industry waste by-products for new energy**

Rimfire Emerging Equities TAX BENEFITS:

- ⇒ **30% Tax Credit** returned thru **2007 Income Tax Return**
